

## Index for Journals, Volume 2

In addition to the journals themselves, introductory essays, annotation, and most reference materials have been indexed. Most maps are not indexed; map coordinates for specific locations are given in the Geographical Directory. Spelling, punctuation, and capitalization of quotations have been standardized. Personal names are listed by their correct spellings, not by variant spellings that may be found in the journals, unless correct spelling is unknown. Entries for women are generally listed under their final married names, with appropriate cross-references under maiden names or earlier married names. Unidentified individuals, such as “Mr. Bridewood,” are included in the index. Joseph Smith (JS) and Emma Smith (ES) are referred to by their initials.

When found in an entry, “id.” indicates an entry in the Biographical Directory or Geographical Directory, “def.” refers to a definition in the Glossary, and “handwriting of” identifies ranges of pages on which an individual inscribed text in the journals. Other documents recorded in the journals, such as letters or revelations, are identified in the Record keeping and Revelation entries.

A cumulative index for the Journals series will be published in the forthcoming *Journals, Volume 3*.
